SUMMARY

A motivated Computer Science undergraduate with strong proficiency in Object-Oriented Programming using Java, C++, and Python. Experienced in building scalable web and security-focused applications through academic and internship projects. Possesses strong problem-solving, communication skills, and a passion for learning in fast-paced technology environments.

EXPERIENCE

Project Developer — EduBond Platform [\[Link\]](#) | ReactJS, Node.js, Express.js, MongoDB, Razorpay API

- Developed a donor-student sponsorship platform for 50+ donors using ReactJS, Node.js, Express.js.
- Automated finance request workflows, reducing manual work by 40%.
- Designed backend data models and APIs enabling real-time tracking for 30+ students.

Frontend Developer Intern — Edunet Foundation [\[Link\]](#)

- Engineered and launched a personal portfolio website using HTML, CSS, and JavaScript on GitHub Pages.
- Highlighted 6 projects using reusable React components with clean, responsive UI.

PRODUCT-ORIENTED TECHNICAL PROJECTS

Real-Time Network Intrusion Detection System (IDS) [\[Link\]](#) | Python, Scapy, Flask API, Machine Learning

- Built an IDS detecting 6+ cyberattacks in real time (100+ packets/sec) with 94% accuracy.
- Engineered custom features inspired by KDD dataset, improving detection reliability by 12%.
- Developed a Flask API with a 2-second refresh dashboard for real-time attack alerts.
- Stress-tested with simulated TCP/IP traffic, sustaining 500+ concurrent requests without downtime.

Phishing Detection Tool [\[Link\]](#) | Python, Gmail API, Flask API, Logistic Regression

- Designed URL and email-based phishing detection modules with 96% classification accuracy.
- Processed and analyzed 15+ live emails via Gmail API using secure OAuth-based access.
- Delivered phishing probability scores via Flask API with <1 second response time.
- Enhanced dataset with 30+ new phishing/legitimate samples, boosting generalization by 8%.

Food Expiry Tracker Using Blockchain [\[Link\]](#) | Solidity, Hardhat, JavaScript, HTML, CSS, MetaMask

- Developed a decentralized food-expiry tracking system using Ethereum smart contracts.
- Implemented Solidity contracts compiled & deployed using Hardhat for reliable local blockchain testing.
- Designed a clean HTML/CSS/JavaScript frontend allowing users to add and verify food expiry details.
- Integrated MetaMask for secure wallet-based interactions with the smart contract.
- Ensures tamper-proof data storage, preventing manipulation of expiry dates and improving supply-chain transparency.

CERTIFICATES

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate [\[certificate\]](#)
- AWS Fundamentals by Coursera [\[certificate\]](#) IAM, VPC, EC2, Lambda, RDS, EBS, S3, DynamoDB, CloudWatch
- Infosys Springboard Cybersecurity and Hacker Tactics Awareness [\[certificate\]](#) Network Security, Ethical Hacking, Cyber Threats, Risk Management

EDUCATION

2022 - present	Bachelor of Technology at SRM UNIVERSITY AP	(GPA: 8.59)
2020 - 2022	Intermediate(+2)	(Percentage: 86%)

TECHNICAL SKILLS

Programming (OOP)	C++, Java, C
Core Concepts:	Object-Oriented Programming, DSA, OS, Networking
Web Development:	HTML, CSS, JavaScript, ReactJS, Node.js, Express.js
Databases:	MongoDB, MySQL
Tools:	Git, Linux, Postman
AI/ML:	Scikit-learn, Pandas, NumPy, Feature Engineering
